The overarching aim of participating in the community is to create a resilient, thriving alternative to the current societal existence, facilitating people’s transition back to nature and a more harmonious way of life.

Our community vision is a culture of sharing and gifting, living in service for the highest good of All ensuring that all members have enough to meet their needs. KindaCommunity is a facilitator for node placement and the new trading resource economy. You do not have to be a member of a community in the network to access the trade economy.
